

Quick N Slick

Polymer Polish and Paint Sealant System

#CCPCG024 32 Ounce Trigger Spray

"You'll never wax with traditional wax again"

Do in minutes what waxing a car took hours to do. Replace Wax and protect your car using a spray on wipe in technology that will outshine, outlast and protect your cars surface far longer than wax. Will not shift in heat or micro crack in cold like wax does!

The surface will be so slick that bugs and road debris will have a hard time sticking to it. It bonds to the surface creating a detergent resistant slick coating with a brilliant shine. Added antistatic properties continue to repel road dust

Did you know, after a rain shower, when the sun comes out, the water droplets standing on the surface act like a miniature magnifying glass bringing intense heat to each area until they dry. Quick-N-Slick will protect your cars surface and produce a shine that you simply will not believe.

- No listed hazardous materials to touch or breathe
- For paint, glass, chrome, polished aluminum and all painted wheels
- No hard work involved, spray and wipe in
- Produces a deep, brilliant shine within seconds of applying
- Allows Unprecedented Long Term Shine, Durability & Sealant
- Antistatic properties continue to repel road dust
- Creates a super slick surface that bugs and tar have a hard time sticking to.

Recommendations for Use

Needed: 2 microfiber towels each folded two times.

For use on a clean surface

1. 1-2 sprays on a dry micro-fiber towel.
2. Rub towel over area to be treated (size of a door panel).
3. Use another clean dry microfiber towel to rub/buff area , for a few seconds until you feel the slickness and see the shine
4. Repeat Steps 1-3 until entire car is done

No Petroleum Solvents - No Listed Hazardous Materials – No VOCs'
